The collection comprises jacket earrings and pendants crafted in pure Sterling Silver embellished with pave set vivid nano gems and brilliant cut cubic zirconias.

Most of the pieces can be worn in two ways serving as the perfect versatile accessories to realize a minimalist or a more intricate look.

Natural beauty

Collection

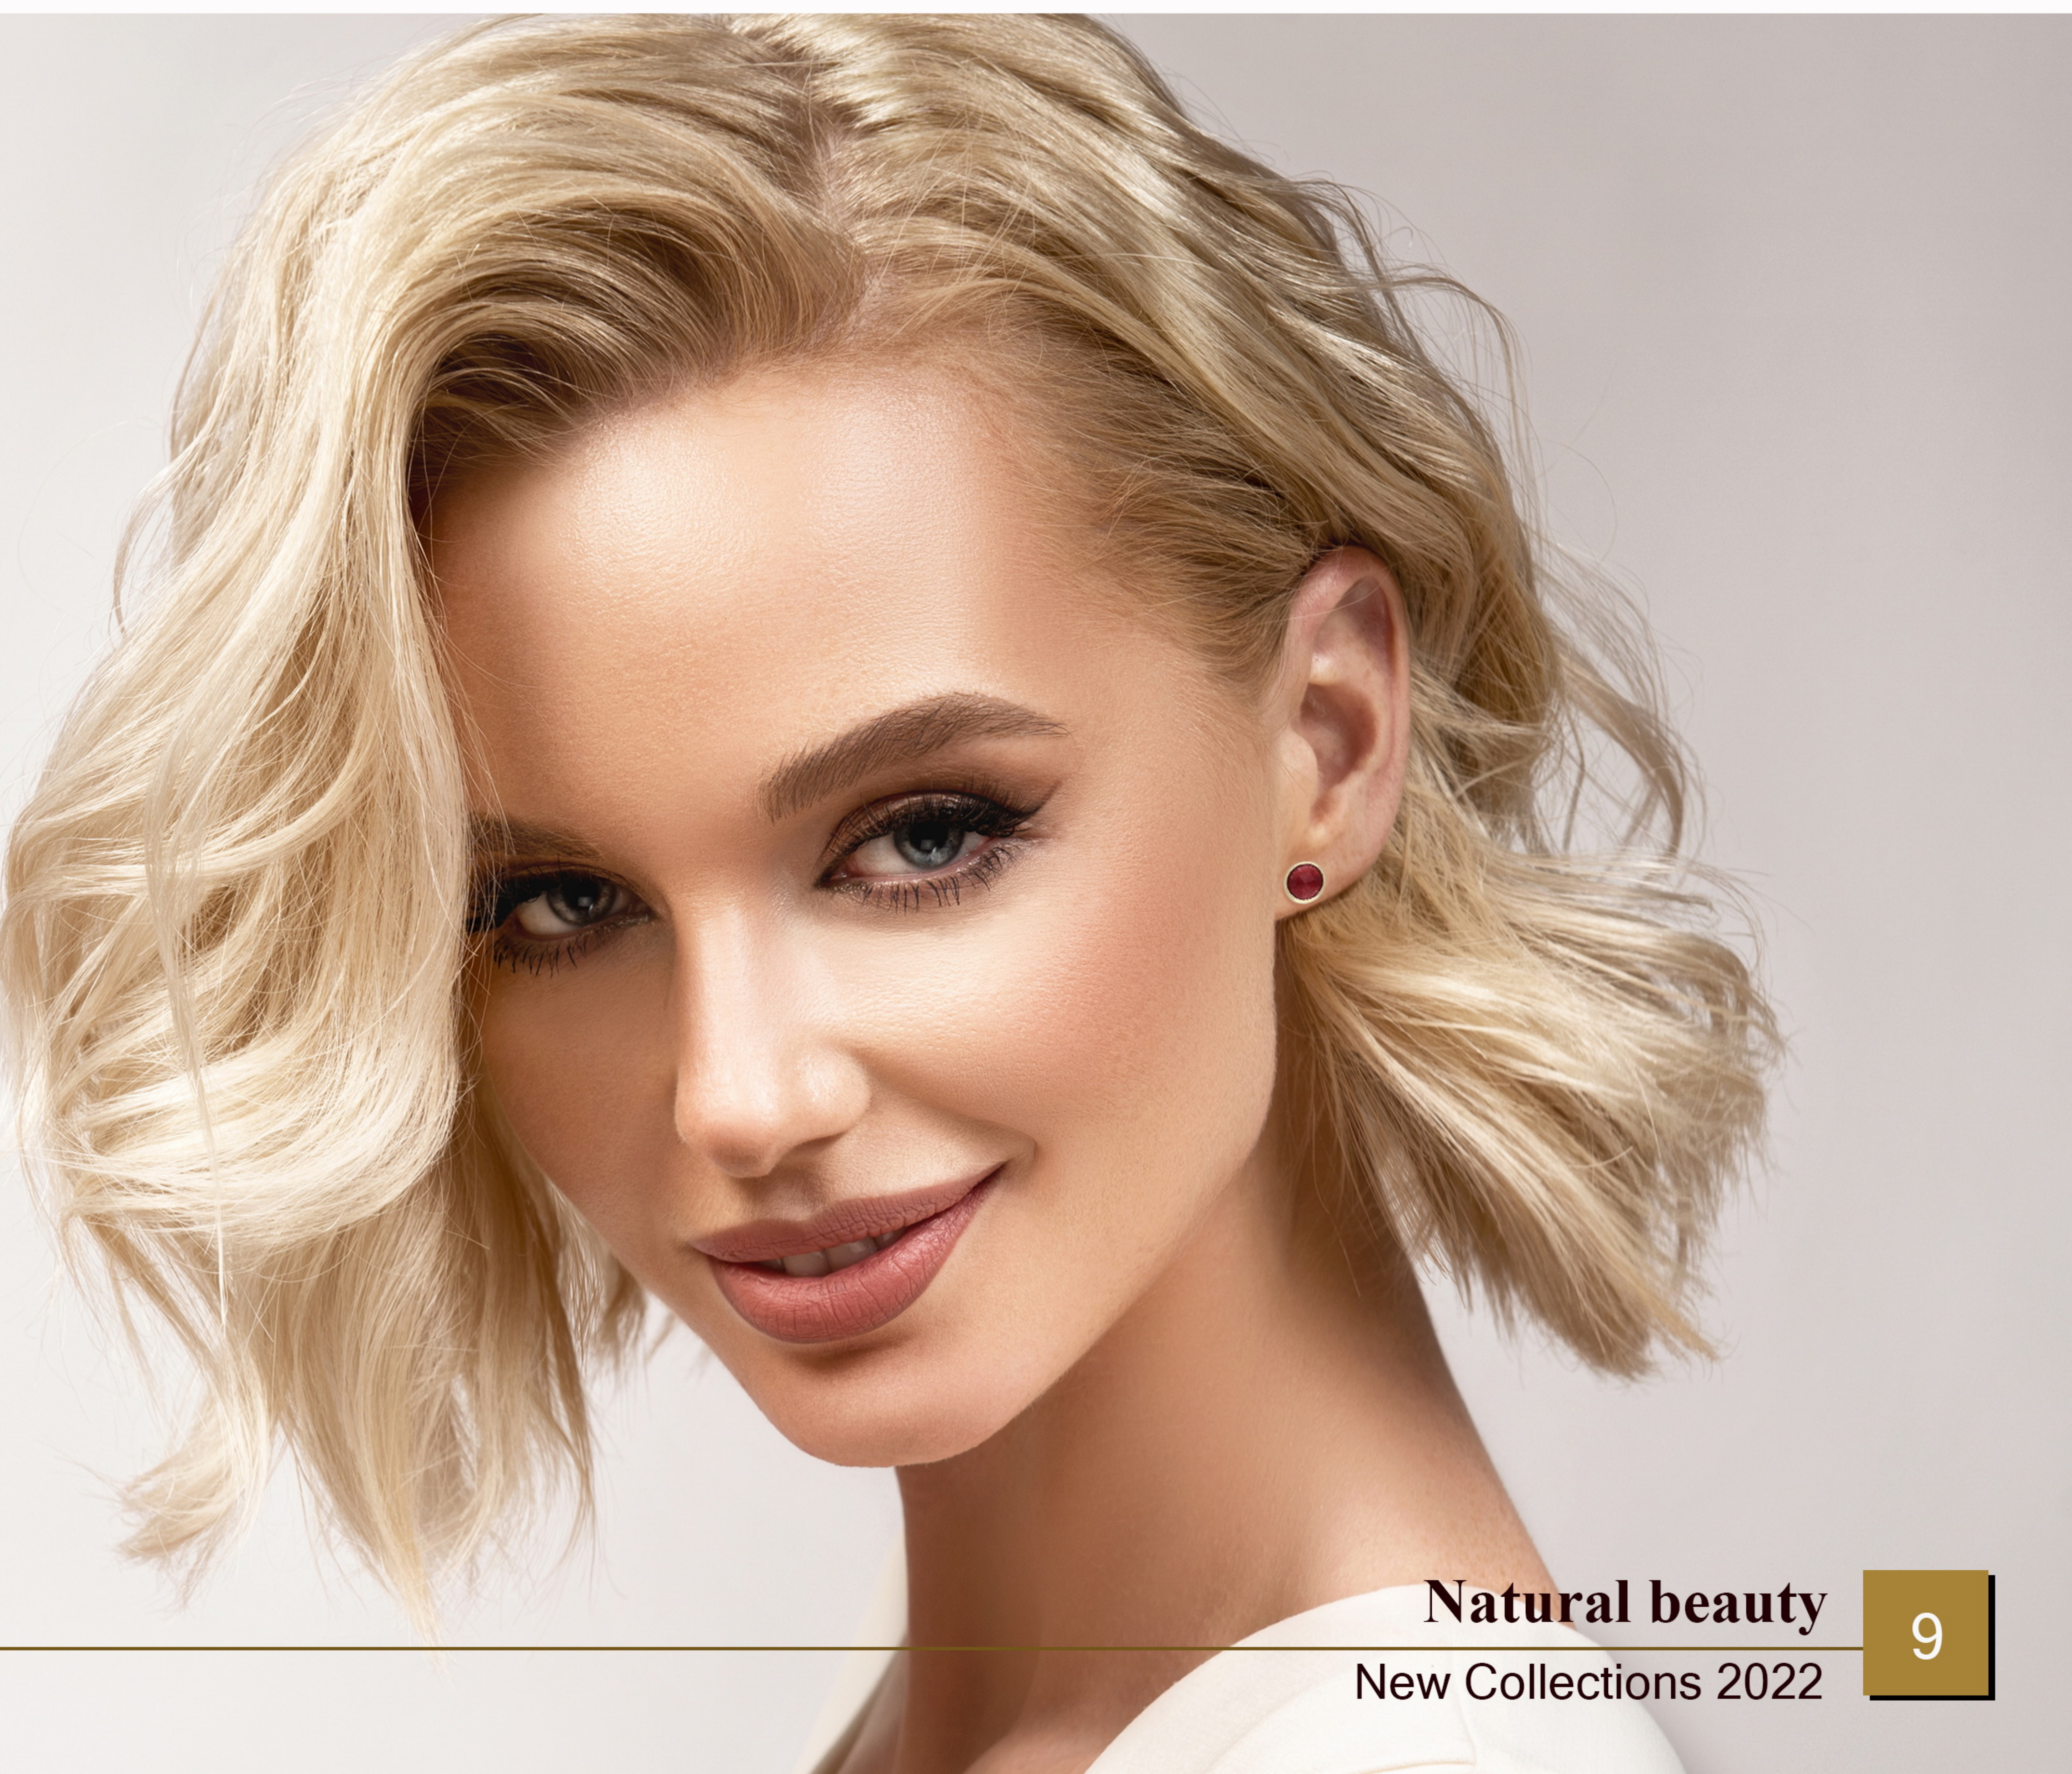

The Natural Beauty collection is an ode to one of our earth's most wondrous miracles — Semi Precious Stones.

The beauty of these gems were millions of years in the making under the earth's crust and this selection is an appreciation of that. It lets these gemstones take center stage by setting them in unhindered settings.

The collection featured rose cut Amazonites, Blue Chalcedonies, Reg Agates, Onyx, Rose Quartz and Citrines. Framed in understated bezel settings of Sterling Silver, they are fitted for customers who are going for a more organic and minimalist style.

BAROQUE PEARL

collection

There is beauty in imperfection. This is the concept of our Baroque Pearl Collection. Derived from the french word baroque, meaning irregularly shaped, this collection features these abstract organic gemstones in sleek juxtapositions of plain Sterling Silver settings.
